Mark Mamual

Jerry Perkins talks to president Carole Watson during a reception that followed the group's initiation.

Art Alvarez

Achievement in Politics

An organization designed for political science majors, Pi Sigma Alpha stresses high academic achievement and future careers.

Mike Russell, vice president, said the political science honorary society enjoys good relations with Tech's political science staff. At meetings, the organization listens to local and regional political science speakers.

Russell said Pi Sigma Alpha's most important function during the 1984-85 school year was Career Day in February. Invited speakers at Career Day were Rita Harmon, speaking about local government; political science professor Lin Hughes, addressing law school; political science professor

Kathryn Anthony and Carolyn McLaughlin listened to a speaker during the Pi Sigma Alpha Career Night, which featured speakers from various areas of political science.

Jerry Perkins, making a presentation about graduate school; and Paul Collins of Great Britain, who spoke about foreign service, the United Nations in particular.

In October, Pi Sigma Alpha and Tech's political science department co-sponsored a presidential election lecture series. Several political science professors representing Tech's department presented free lectures about various aspects of the election process.

Pi Sigma Alpha also sponsors a Professor of the Year award. 1984-85 nominees were John Burnett, Norm Baldwin and Bill Nicholls, and Nicholls won the award.

Nicholls was recognized at the end-of-the-year party in April.

Officers were Carole Watson, president; Russell, vice president; and Stuart Miller, secretary-treasurer.

— Camille Wheeler
